

Summer Pre-Algebra Review

A summer camp to strengthen math skills

This summer math camp will help strengthen math concepts that will be crucial for Algebra I and beyond. The math camp will take place in a small group environment and various instructional approaches will be used, including a multisensory approach, strategies for approaching problems, and games.

Help your student develop a more solid understanding of the concepts that are often confusing for middle school students such as:

- Fractions
- Decimals and percentages
- Positive and negative integers
- Order of operations
- Exponents

This camp is open to **7th and 8th grade students** and will take place from **July 23rd-August 2nd**. This **2 week long** camp will be held **Monday-Thursday** from **10am-12pm**. The total cost for the camp is \$800.

This summer camp is conducted by **Susan Chait, M.A.**, a specialist in **Making Math Real**, and is individualized based on the needs of each child. **Specific goals** are set for each child depending upon their specific difficulties. We appreciate **parent involvement** and **feedback** throughout the course.
